Studies

06-12-2026 **University of Washington** **Seattle, WA, USA**
Master of Science in Information Management
- GPA 4.0, Link to Credential – Use Credential ID CeDiD: 26V3EJJQNFOF and Name: NI

07-17-2008 **Fidélitas University** **San José, Costa Rica**
Bachelor of Science in Electrical Engineering
- World Education Services (WES) certified (NACES member).

06-30-2005 **University of Costa Rica** **San José, Costa Rica**
5 Semesters - Electrical engineering Studies
- World Education Services (WES) certified (NACES member).

Certifications

11/01/2026 **Codecademy AI Engineer – Show Credential**

10/10/2026 **Codecademy Full Stack Engineer - Show Credential**

03/29/2019 **AAMI Integrating Risk Management into the Product Lifecycle**

07/31/2017 **Blackberry & Cross Lean Six Sigma Black Belt Executive**

04/09/2010 **AAMI Software Validation Requirements and Industry Practice**

Skills

- **AI applications and Agents Design and Development**
- **Web Application Design and Development**
- **Python, JavaScript, HTML and CSS Programming – GitHub portfolio**
- **AI assisted development and programming**
- **Software, equipment and process validation**
- **Support and implementation of Software**
- **Systems thinking, analysis and design**
- **Design and development controls**
- **Systems architecture, design, and implementation**
- **Project management and consulting**
- **Threat and risk management**
- **Lean and continuous improvement**
- **Management and strategic leadership**
- **Statistical Analysis**
- **Value stream mapping**
- **Auditing**
- **Root cause analysis and problem solving**
- **Cross functional collaboration and integration**

Languages

- **English: advanced written and oral skills**
- **Spanish: native language**

Experience

2019 – 2026 Philips Oral Healthcare 1) Safety, Quality and Regulatory Leader, 2) Head of Product Quality Engineering, 3) Special Assignment Remediation and Transition

- Team Management (Direct: 4 Managers, Indirect: 29 Engineers, Dotted: 2 Managers).
- Accountable: Management Representative (up to July 2025) and single point of contact for the Leadership team.
- Responsible for: Oversight of design, development, manufacturing, distribution and post market surveillance of oral healthcare products (hardware and software) worldwide. Application of hardware and software design controls, statistical analysis, risk management and problem solving. Establishment of a QMS compliant with ISO9001, ISO13485, and ISO22716.
- Accomplishments: **1)** Remediation of product quality and compliance gaps. Elimination of deviations. All metrics met by June 2025. Organizational culture transformation merging consumer products (high speed) and medical devices (highly regulated). **2)** Global capability buildup in risk management, quality engineering biocompatibility, software quality, statistical analysis and root cause analysis (CAPA). **3)** Seamless handoff of responsibilities.

2013 – 2019 Philips Image Guided Therapy 1) Sustaining Design Assurance Manager, 2) Quality Operations Manager, 3) Quality Compliance Supervisor

- Team Management (10 Engineers, 20 Technicians)
- Responsible for: Application of design controls (design changes and design transfer), complaint analysis and trending, and risk management. Receiving, In-Process, Final Inspection and Quality Engineering departments. Documentation Control, Compliance and Training departments (Corporate-wide).
- Accomplishments: **1)** Setup of the Sustaining Design Assurance team. Implementation of state-of-the-art complaint trending procedures. Implementation of new risk management process for contract manufacturing. **2)** Hire and onboarding of quality engineering resources. Implementation of improved Process Validation procedures. Reduction of NCR lead times to < 30 days. Successful completion of all external audits with 0 findings. SAP implementation completion. **3)** Successful hire and transfer of global support of documentation control activities to the Costa Rica facility. Full compliance with CAPA system and execution of multiple internal audits. Setup of the audit management model for the Costa Rica facility.

2009 – 2013 Hospira 1) Quality Section Manager, 2) Senior Quality Engineer – Infusion Pumps, 3) Senior Validation Administrator, 4) Software Quality Engineer

- Team Management (6 Engineers, 7 Technicians)
- Responsible for: global Documentation Control department for the Infusion Pumps branch. Core team member for Design Controls remediation activities. Manufacturing Quality and Quality Engineering teams' administration. Internal auditing. Internal consulting on quality requirements for continuous improvement initiatives and process improvements. Validation department and system administration. Oversight and compliance of all software and hardware validation activities.
- Accomplishments: **1)** Lean deployment of an improved documentation management process. Establishment of the documentation control team. Remediation activities for FDA import ban of Infusion Pumps manufacturing. Rework process improvement with world class approach. **2)** Implementation of a change control process. Incorporation of Advanced Product Quality Planning (APQP). **3)** Implementation of a process validation system. Completion of all validations supporting the Infusion Pumps manufacturing process. Statistics expertise to improve analytical validation and control planning. Validation of a software database for validation documentation change control. **4)** Full-scale identification of production and quality system software and completion of remediation of validation for the identified tools.

2005 – 2009 Western Union Senior and Lead Systems Support Engineer

- Team Management (5 Engineers)
- Responsible for: Application and computers technical support. Troubleshooting. Project Management.
- Accomplishments: Troubleshooting and setup of system operation in Dominican Republic and Jamaica. Training and establishment of the systems support group in Omaha. Completion and incorporation of practices from CompTIA and ITIL training for the systems support group. Troubleshooting of applications in C++ using MySQL.
